

Splodge

hygiene

**“It’s fun to
be hygienic”**

Dear Care Professional,

Patient health through reduced **cross-infection** is a critical factor to improving your care environment and reducing costs.

At Jalkin, we take an **evidence-based** approach to help our customers strengthen **infection control**:

- using innovative, lab-tested, **alcohol-free Splodge** products
- maximising **compliance** to best practices
- boost compliance by being **fun!**

Our customers are **delighted**, we look forward to working with you,

Yours,

The Jalkin Team,

specialists in human waste and infection control

Unique, laboratory-tested performance:

Kills bugs in a 3-step process

Effective with no alcohol

**Penetrate deep
into dirt**

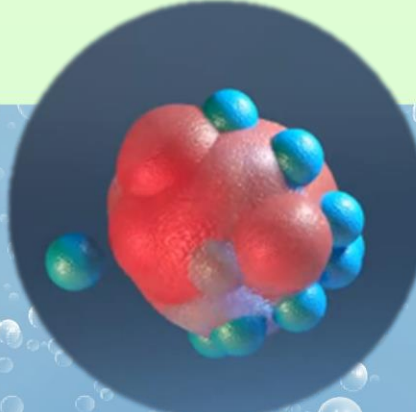

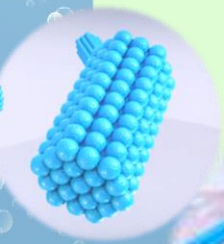

**Kill the
bugs**

**Clean the
surface**

Anti-surfactant properties of the Splodge chemical allow it to penetrate deep into the dirt, deeper than standard chemicals that settle only on the surface.

The molecules bind to the surface of pathogens, disrupting their membrane structure and causing cell destruction. Splodge is formulated to be effective against bacteria, fungi, viruses and spores.

The fast-acting sanitisation allows surfaces to be wiped clean promptly. For pathogens requiring longer contact-time, the alcohol-free Splodge mean this is possible while still being kind to sensitive skin.

Laboratory proven results

Adenovirus | Aspergillus Niger | Bacillus Subtilis spores | Bacteriophage Virus | Campylobacter | Candida Albicans | Canine Parvovirus | Clostridium Difficile | Clostridium Difficile spores | Diseases of Poultry Order & Avian Influenza | E. Coli | Enterococcus Hirae | Eperdermophyton Floccosum | Eschenchia Coli | H1N1 Influenza A | H1N1 virus | Hepatitis B | Hepatitis C | HIV | Influenza | Klebsiella Aerogenes | Klebsiella Fortuitum | Legionella Pneumophila | Leptospirosis species | Listeria Monocytogenes | M. Avium | M. Fortuitum | M. Tuberculosis | Microsporum Canis | Microsporum Gypseum | Murine Norovirus | Mycobacteria | Mycobacterium Terraе | Newcastle Disease | Odium lactis | Orthopox | Penicillium Funiculosum | Pneumococci Patient Strain | Polio | Poliovirus | Proteus Mirabilis | Proteus Vulgaris | Pseudomonas Fluorescens | Pseudomonas Aeruginosa | Saccharmyces Cerevisiae | Saccharomyces Cerevisiae | Salmonella choleraesuis | Salmonella Enteriditis | Salmonella Typhimurium | Shigella Flexneri | Shigella Sonnei | Staphylococcus Aureus | Streptococcus Epidermidis | Streptococcus Faecalis | Streptococcus Pyrogenes | Trichophyton Mentagrophytes... Pass or 99.99 efficacy, full Biochem test details, laboratory information and contact times available on request.

Hand cleaning everywhere:

The Splodge Dongle

Alcohol-free hand sanitiser on a convenient lanyard

Recommended issue for all staff

Wall-mounted Splodge dispensers

for Splodge medical hand scrub and foam hand sanitiser

Position near doors, sinks and high-traffic areas

Splodge medical hand scrub

The sanitising alternative to soap

Ideal for visitor, resident, relatives, patient and staff usage

Splodge foam hand sanitiser

No rinse required, alcohol free

Allows greater contact time for anti-pathogen efficacy

Surfaces, appliances and spills:

Splodge surface sanitiser

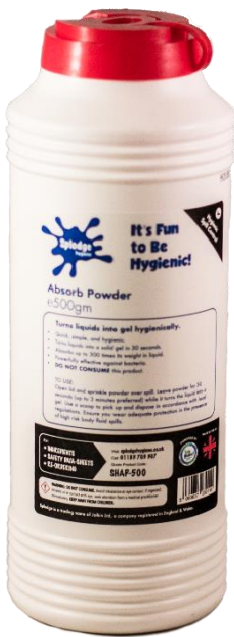

500ml sanitising surface spray for general surface cleaning

Super-absorbent powder

For easily soaking up and collecting spills

Turns liquid into gel

Splodge Sanitiser concentrate

5 litres cost-effectively refills ~100 spray bottles

Ideal for high risk surfaces

Bed pan washer & macerator cleaners

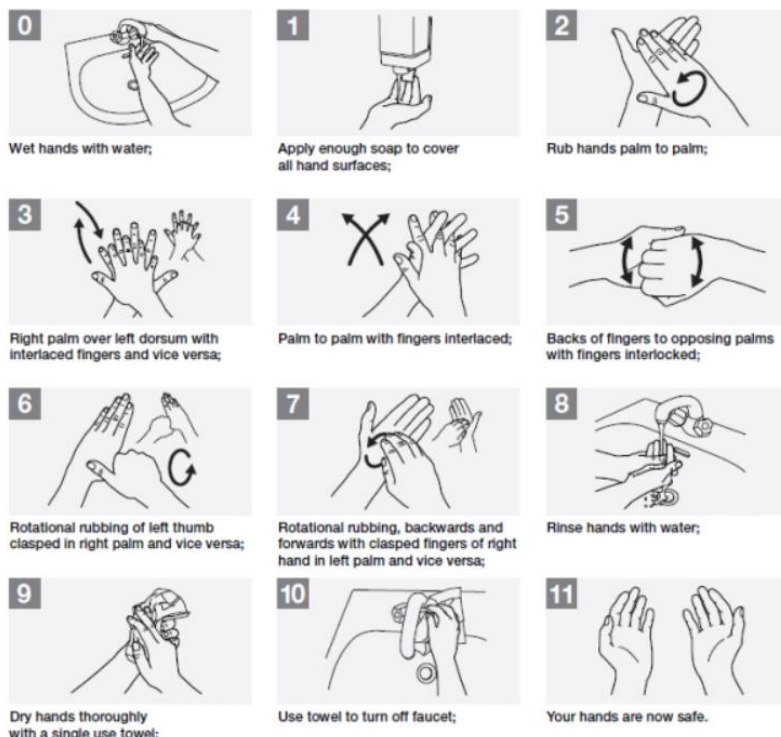

With the Splodge colour-matching scheme

Improved compliance in your sluice-room
